

Project 2: Notes App

User Interface

Project 2: Notes App

Requirements

- Type and create notes
- Save notes to file (load on startup)
- List notes
- Tap note to see and edit note details
- Sort notes via picker(s)
- Swipe to delete notes

Project 2: Notes App

Hints

- Note type will need to conform to Codable and Identifiable
- Use .onChange modifier for updating sorting
- Use .onDisappear modifier to save edits

Project 2: Notes App

Try to Include

- Custom enum for the sort / direction values
- Save button should only be available if both fields have text
- Sort options should only be displayed if there are 2+ notes

Project 2: Notes App

Extra Credit

- Persist the selected sort options for subsequent executions
- Enhance notes with...
 - Priority
 - Due date
 - Mark as done
